

## 3<sup>rd</sup> party xml import

In order to integrate any 3<sup>rd</sup> party service provider inside TINA, you need to have deployed the 3<sup>rd</sup> party xml import optional feature. This allows you to setup any type of import from 3<sup>rd</sup> party systems like: insurance services, hotel consolidators, car rental services, websites, etc.

### Characteristics **Product main features**

The 3<sup>rd</sup> party xml import optional feature allows the travel agency to integrate inside TINA any 3<sup>rd</sup> party service supplier. The product's main characteristics are:

- ✓ **xml support:** allows the import of any type of reservation (confirmed or not) in a unitary xml format which is fully compatible with TINA
- ✓ **Unlimited number of systems:** once the product is deployed, you may import inside TINA information from an unlimited number of 3<sup>rd</sup> party systems. There is no limitation.
- ✓ **Individual configuration for each system:** TINA allows the user to setup individual configuration for each system that is integrated via the 3<sup>rd</sup> party xml import feature.
- ✓ **Perfect match with any TINA configuration:** each travel agency is somehow unique. In this respect, TINA provides the necessary tools for a specific (unique) configuration. In addition, the 3<sup>rd</sup> party xml import allows for perfect matching between the 3<sup>rd</sup> party system information and the service structure inside TINA.

### Advantages **Reduced costs, improved efficiency!**

By having the 3<sup>rd</sup> party xml import optional feature deployed, you will have the following advantages:

- ✓ Possibility to integrate TINA with any 3<sup>rd</sup> party service provider
- ✓ Reduce considerably the time needed to process a reservation inside TINA
- ✓ Better control over the travel agent activity
- ✓ Better control over the invoices due to the suppliers
- ✓ Possibility to integrate the selling platform from the website together with TINA

### Benefits **Real, mesurable and instant benefits for you!**

By implementing the 3<sup>rd</sup> party xml import optional feature your travel agency is instantly provided with the following benefits:

- ✓ **Reduce the workload of your travel agents:** for each system integrated with TINA, the agent does not have to manually input the offers or reservations made. They are automatically transferred inside TINA.
- ✓ **Increase the efficiency of your travel agency:** with little effort, your travel agents are able to input several offers for a client request thus providing better service while decreasing the workload
- ✓ **Better reporting:** if all the offers made to your clients are transferred inside TINA, the reporting capabilities of TINA increase exponentially. Some examples:
  - **Better negotiation position:** by being able to report to your client your workload automatically you will have a stronger negotiation position;
  - **Better supplier rates:** by being able to automatically compare rates from several providers you may be able to choose the one that is better for you;

### Key features

- ✓ *xml import support*
- ✓ *Fully configurable*
- ✓ *Increase the efficiency of the travel agency*
- ✓ *Integrates all your 3<sup>rd</sup> party providers inside TINA*

### Tips & Tricks

- ✓ *Automatically transfer offers from different suppliers in order to identify the best rates for you*
- ✓ *Provide your clients with full transparent information about your workload in order to get a better service fee negotiation position*
- ✓ *By asking your agents to import everything inside TINA you will get better control of their activity and workload*
