

Credit Limit

In order to better monitor the financial activity of your clients the Credit Limit optional TINA feature is the tool to have. It allows for the definition of the credit limit for each individual client based on a set of rules by your choosing. The included alert system will make sure that once the credit limit is reached the proper persons inside the travel agency are notified

Characteristics Product main features

The Credit Limit optional TINA feature, allows the travel agency to perform the following actions:

- ✓ Setting up a credit limit as well as an alert limit for either each individual client as well as for each individual segment of clients; the segmentation can be done manually or automatically.
- ✓ Setting up alerts (inside TINA as well as via emails) once the alert or credit limit is reached.
- ✓ Interactively monitor the current situation (in real time) by accessing the monitoring section (no need to generate a report as all the information is displayed in a special section)
- ✓ Once the credit limit is reached, the application will automatically block the client and no further sale is possible; at the same time, the designated persons inside the travel agency are notified

Advantages Better control over your financial situation!

The Credit Limit optional TINA feature is a powerful tool witch delivers to the travel agency using it imidiata advantages:

- ✓ Automated control over the financial relationship with your clients once all the settings are made
- ✓ Having a real time interactive report of the current situation. Beside the total current debit and the current credit and alert limit, this module will also provide you with an analysis in respect with the amount of money gained or lost due to currency exchange rates differences between the date of the invoice and the date of the payment.
- ✓ Real time alerts inside the application or via email.

Benefits Real, mesurable and instant benefits for you!

By implementing the Credit Limit optional TINA feature, your travel agency will instantly take full advantage of the following main benefits:

- ✓ Full and instant control over the financial relationship with any of your clients;
- ✓ Cost reductions by providing the designated persons with real time, easy to check information as well as by taking automated actions (alerts, blocking of the client additional sales, etc);
- ✓ Real time analysis of the profitability of the client in respect with the currency exchange rates changes between the time of the invoice issuance and the time of payment;
- ✓ Real time access to the current financial situation (overall debit analysis as well as in depth client analysis)
- ✓ Full control over the displayed information

Key features

- ✓ Define credit and alert limits for a client or a segment of clients
- ✓ Monitor interactively the current situation
- ✓ Automated alerts
- ✓ Automated blocking of the client once the limit is reached

Tips & Tricks

- ✓ Use the automated segmentation in order to quickly deploy the solution. Additional fine tuning of each client should be done afterwards
- ✓ Make sure you have defined all the persons that need to be notified in case the alert or credit limits are reached
- ✓ Feel free to let us know any additional function you would like to have inside the Credit Limit optional feature in order to better serv your specific needs
