

3rd party xml import

In order to integrate any 3rd party service provider inside TINA, you need to have deployed the 3rd party xml import optional feature. This allows you to setup any type of import from 3rd party systems like: insurance services, hotel consolidators, car rental services, websites, etc.

Step 1

Getting the product

In order to get the product you should contact your local Amadeus representative and complete the necessary order forms. Should you have any problems in locating the right person please feel free to use the contact information presented below.

Once this process is finished you will be eligible for the deployment of the product as soon as a deployment slot is available.

NOTE: the deployment of the solution may also require for a TINA update, so in this respect, please contact our support department for additional information

Step 2

Deployment of the product

The deployment of the optional feature: 3rd party xml import is provided by our technical support team based on your request. The product is deployed as a new plug-in inside your TINA version and is instantly accessible after the deployment

Together with the deployment, a full user guide will be provided to you as well as an overview presentation of the configuration section. Additional training is available upon additional request.

Step 3

Production phase

Once the product is deployed, you need to take the following steps in order to be able to take full advantage of its features:

- ✓ Discuss together with your suppliers in order to get from them the needed transfer of information.
- ✓ Select the method of transforming the information received from your supplier into the xml format supported by the 3rd party xml import. Several options may be considered:
 - Ask your supplier to make the necessary changes;
 - Address dc+ with a request in order to develop the necessary software;
 - Address any 3rd party software provider in order to help you with the development of the necessary software;
- ✓ Make the necessary configurations inside the 3rd party xml import settings module available inside TINA.

Key features

- ✓ xml import support
- ✓ Fully configurable
- ✓ Increase the efficiency of the travel agency
- ✓ Integrates all your 3rd party providers inside TINA

Tips & Tricks

- ✓ Automatically transfer offers from different suppliers in order to identify the best rates for you
- ✓ Provide your clients with full transparent information about your workload in order to get a better service fee negotiation position
- ✓ By asking your agents to import everything inside TINA you will get better control of their activity and workload
